# ABSTRACT

This documentation was prepared in accordance with a Memorandum of Agreement (MOA) signed by the Department of Energy–Savannah River (DOE-SR) and the South Carolina Historic Preservation Office (SHPO) dated February 17, 2004, as well as the Consolidated MOA of August 2004. The MOA stipulated that a thematic study and photographic documentation be undertaken on A Area historic properties 703-A and 708-A. In addition, a Cultural Resource Management Plan was accepted and signed by DOE-SR and the SHPO on December 9, 2004 calling for documentation of the remainder of the A Area buildings that were deemed eligible for listing in the National Register of Historic Places (NRHP) as contributing resources to a Savannah River Site (SRS) Cold War Historic District. The impetus for the study was the imminent decommissioning and/or dismantling of the majority of NRHP eligible buildings in A Area. The resulting narrative is based on field analysis, oral history, primary documentation and research. New South Associates prepared the narrative and Westinghouse Savannah River Company (WSRC) completed the photographic documentation.
